Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

However, it would have been easy for a person skilled in the art to conceive of establishing suitable values for the dimensions of the various parts of an exhaust manifold, and thus the inventions set forth in claims 1, 3 and 4 do not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Claim 2

Document 3 discloses an exhaust manifold for an internal combustion engine, wherein an appropriate value has been delimited for the ratio of the diameter of a branching tube of the exhaust manifold relative to the diameter of the exhaust valve seat thereof.

However, it would have been easy for a person skilled in the art to conceive of establishing suitable values for the dimensions of the various parts of an exhaust manifold, and thus the invention set forth in claim 2 does not involve an inventive step in the light of document 3 cited in the international search report.
